PROFILE

Aspiring UI/UX Designer with an Engineering background and hands-on Figma experience designing mobile apps and web platforms end-to-end — from user flows and wireframes to interactive prototypes and design systems. Brings a research-driven design process, strong attention to detail, and cross-functional collaboration skills developed through real engineering and creative projects.

EDUCATION

Bachelor's Degree, Communications and Electronics Engineering

Delta University, Egypt

Expected Graduation: 2028

UX/UI PROJECTS — SELECTED CASE STUDIES (FIGMA)

Fixly — Home Services Booking App

- Designed an end-to-end mobile experience connecting users with trusted home-service professionals, covering discovery, booking, and order tracking.
- Conducted competitor research to identify UX gaps in existing home-service platforms before defining the user flow.
- Built a reusable design system and component library to maintain visual consistency across the app.
- Delivered an interactive Figma prototype simulating the complete booking journey.

Brewly — Coffee Ordering Platform (Coffee Haven)

- Designed a coffee ordering platform enabling users to explore the menu, customize drinks, and complete orders through a streamlined flow.
- Mapped user flows and wireframes from scratch, informed by competitor research on ordering-app patterns.
- Created a component-based design system for menu items, customization options, and order states.
- Prototyped key interactions, including drink customization and checkout.

GrowthSpace — Digital Marketing Agency Landing Page

- Designed a conversion-focused landing page to showcase services and support lead generation for a digital marketing agency.
- Researched competitor agency websites to define page structure and content hierarchy.
- Built the layout on a consistent design system and delivered an interactive Figma prototype for review.

SweetBite — Interactive Product Landing Page (Donut Delight)

- Designed an interactive donut-shop landing page where the interface dynamically changes color based on the selected flavor, creating a playful, product-led browsing experience.
- Defined the user flow and interaction logic for flavor selection, then built a working Figma prototype.
- Used a modular component library to keep flavor-based theming consistent throughout the page.

Gohary Burger — Fast-Food Ordering App

- Designed a mobile ordering app enabling users to browse the menu, customize meals, and complete orders through a clean, intuitive flow.
- Conducted competitor research on food-ordering apps to shape the information architecture and user flow.
- Built a design system for menu cards, meal customization, and order-status components.
- Delivered a high-fidelity interactive prototype covering the full ordering journey.

PRACTICAL EXPERIENCE

Team Lead — Hardware Design & UI/UX | Delta University — Engineering Capstone Project

Oct 2025 – Dec 2025

- Led a multidisciplinary engineering team, personally responsible for both the hardware design and the UI/UX design of the project's electronic system interface.

- Integrated the hardware and interface design into one cohesive, functional system — from wireframes to high-fidelity mockups.
- Delivered a responsive interface aligned with technical constraints, performing reliably across connected devices.

UI/UX Designer | Graduation Project — Mobile App & Web Platform

Present

- Currently designing the UI/UX for a large-scale graduation project spanning both a mobile application and a web platform.

Design Lead | Aurise Perfume

Present

- Currently overseeing and assigning all design work for the perfume brand Aurise Perfume to a team of designers — including branding, visual design, print materials, 3D designs, videos, and the brand's overall media.

Additional Design Experience

- Worked as a Graphic Designer at Al Wafi Games Company (Mar 2024 – Jan 2026) — designed graphics for game-related products as part of the in-house design team.
- Extensive freelance design work across multiple clients and projects, in addition to full-time and part-time roles.
- Worked as a Designer at Al-Sadek Advertising & Marketing (Jan 2024 – Apr 2024) — specialized in print design, gaining hands-on knowledge of print production and print product types.
- Event Designer for IEEE events and Delta University events, including Job Fair posters, branding assets, and print production.
- Led the Media Committee on a separate events team, heading a team of designers and working as a video editor across multiple projects.

SKILLS

- UI/UX Design: Wireframing, Interactive Prototyping, User Flows, Design Systems & Component Libraries, Usability Principles, Responsive Design, Basic Competitor/UX Research
- Design Tools: Figma, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, DaVinci Resolve, Miro, Canva, Framer
- Technical Literacy: HTML, CSS, PHP, SQL fundamentals (supports design-to-development handoff)
- Soft Skills: Creative Problem-Solving, Attention to Detail, Cross-Functional Collaboration, Client Communication, Adaptability

CONTINUOUS LEARNING

- Google UX Design Professional Certificate coursework (Coursera & video resources) — UX fundamentals, research methods, wireframing, prototyping
- Advanced Figma techniques — self-directed study via online tutorials

Languages: Arabic (Native), English (Basic — actively improving)
